

RESIDENT OF THE MONTH

During her residency training, Dr. Sharif has impressed faculty in the areas of patient care and professionalism. As a senior on the inpatient Family Medicine Service, one of her interns described working with her as a wonderful experience that improved their own confidence, decision making and development of appropriate assessments and plans. Another intern found Dr. Sharif to be knowledgeable, supportive and always willing to teach. During her Health Policy rotation, she drafted a letter to a member of the New Mexico House of Representatives advocating for increased loan repayment incentives to recruit more health care professionals to the state. We will certainly miss Dr. Sharif upon graduation!

RESIDENT OF THE MONTH

Throughout residency, Dr. Canedo has excelled in patient care and systems-based practice.

For the last month, he has served as a stellar senior resident on the inpatient Family Medicine Service. In this role, he assisted interns with navigating the complex U.S. health care system, while also providing them with excellent feedback regarding their assessments and plans during inpatient rounds. He also acted upon patient safety concerns in a timely manner. One of his most impressive victories was securing prior authorizations for two medications that a patient needed in order to be discharged from the hospital. We look forward to continuing to work with Dr. Canedo for at least another year!

RESIDENT OF THE MONTH

During his intern year, Dr. Asghar has performed highly in the areas of medical knowledge and practice-based learning and improvement. For example, while rotating on the inpatient Family Medicine Service, he read the literature regularly regarding the care of his patients to build his own medical knowledge. In addition, he shared this knowledge with other members of the team to facilitate their learning as well. He also demonstrated a remarkable openness to feedback and commitment to personal and professional growth. We look forward to working with him for the next three months before he moves to Alamogordo to complete the last two years of his residency training!
